

Tot whom it may concern:

Leave my XM Radio alone! I pay for its services, I need the services it provides and see no reason for any intervention from any agency. I travel and use the traffic information, as well as the weather information to give me advance warning as to conditions in front of me...I value time spent listenting to music without the bothersome and obnoxious commercials that i would otherwise have to suffer through.

I urgently demand the FCC reject the NAB petition 04-160. I have waited a long time to have what XM Radio provides. Leave it alone. It does not need fixing, because it is not in need of repair!
